## EXPERIENCE

### Senior Frontend Software Engineer - QuinStreet, Inc. / Austin, TX

MAY 2023 - AUG 2024

- Spearheaded initiatives to elevate developer experience, introducing a robust code review process, streamlined code dependency management, and executed comprehensive refactoring of outdated React codebases, resulting in increased efficiency and codebase quality.
- Demonstrated expertise in working with diverse technologies on high-traffic organic and SEM websites,, including React, Vue, Typescript, and Wordpress.
- Worked directly with designers & stakeholders to improve UX and assure technical feasibility for designs

---

### Senior Software Engineer II - Array / New York

SEPT 2022 - FEB 2023

- Enhanced web component accessibility by introducing automated testing with Playwright and creating manual testing plans for QA analysts.
- Built Svelte/TypeScript web components for new product initiatives.
- Collaborated with other engineers, PMs & product owners to determine front end requirements for roadmap initiatives.

---

### Senior Front End Engineer - Winston Project LLC & Noodle, Inc / New York

JULY 2021 - SEPT 2022

- Spearheaded the rapid establishment of a greenfield front-end component library, integrating cutting-edge technologies like Vue, AlpineJS, Eleventy, and TailwindCSS within a 90-day timeframe.

- Managed end-to-end front-end project processes, ensuring quality and consistency throughout development.
  - Developed and deployed feature-rich solutions for an enterprise CMS using Vue.js, resulting in a 15% app performance improvement and a 20% reduction in code complexity.
  - Enhanced UX by efficiently migrating microsites from legacy systems to current standards, providing a superior user experience and reducing development time by 50%.
  - Played a pivotal role in the successful acquisition of Eleven21 by Noodle, showcasing adaptability in both brownfield and greenfield scenarios.
- 

## **Front End Developer I - III - Kasasa / Austin, TX**

FEB 2013 - JULY 2021

- Implemented effective solutions for browser compatibility issues and JavaScript errors, resulting in improved website performance and user satisfaction.
- Collaborated with Product, UX, SEO, Analytics, and Back End teams to continuously improve Kasasa's CMS and website products, prioritizing the user experience.
- Refactored front end component library into Bootstrap, decreasing team development time for site builds by an additional 30%.
- Lead developer on a special project team tasked with migrating 140+ websites into Kasasa's proprietary CMS, completing corporate goals within 6 months.
- Led project to launch sites in new enterprise-level CMS (dotCMS), including writing documentation and working closely with backend developers to determine product requirements.
- Developed pixel-perfect websites from design mockups into a proprietary CMS using HTML5, CSS, and Javascript, responsive web design, SEO & accessibility best practices.
